college students are now regarded as consumers not students and nowhere is the growth and exploitation of the university more obvious than in the realm of college sports where the evidence is in the stadiums built with corporate money and the crowded sporting events sponsored by large conglomerates the contributors to sport and the neoliberal university examine how intercollegiate athletics became a contested terrain of public private interests they look at college sports from economic social legal and cultural perspectives to cut through popular mythologies regarding intercollegiate athletics and to advocate for increased clarity about what is going on at a variety of campuses with regard to

athletics focusing on current issues including the ncaa title ix recruitment of high school athletes and the penn state scandal among others sport and the neoliberal university shows the different ways institutions individuals and corporations are interacting with university athletics in ways that are profoundly shaped by neoliberal ideologies

we ve heard plenty from politicians and experts on affirmative action and higher education about how universities should intervene if at all to ensure a diverse but deserving student population but what about those for whom these issues matter the most in this book natasha k warikoo deeply explores how students themselves think about merit and race at a uniquely pivotal moment after they have just won the most competitive game of their lives and gained admittance to one of the world s top universities what warikoo uncovers talking with both white students and students of color at harvard brown and oxford is absolutely illuminating and some of it is positively shocking as she shows many elite white students understand the value of diversity abstractly but they ignore the real problems that racial inequality causes and that diversity programs are meant to solve they stand in fear of being labeled a racist but they are quick to call foul should a diversity program appear at all to hamper their own chances for advancement the most troubling result of this ambivalence is what she calls the diversity bargain in which white students reluctantly agree with affirmative action as long as it benefits them by providing a diverse learning environment racial diversity in this way is a commodity a selling point on a brochure and as warikoo shows universities play a big part in creating these situations the way they talk about race on campus and the kinds of diversity programs they offer have a huge impact on student attitudes shaping them either toward ambivalence or in better cases toward more productive and considerate understandings of racial difference ultimately this book demonstrates just how slippery the notions of race merit and privilege can be in doing so it asks important questions not just about college admissions but what the elite students who have succeeded at it who will be the world s future leaders will do with the social inequalities of the wider world
