at the heart of this book is the idea that president trump s governing style has been a prelude to the semi democratic authoritarian government that could take hold after the white majority of voters who have the keys to wealth and power today become a minority around 2050 with this in mind the book analyzes trump s attempt squeezed between two impeachments in a single term an all time record murky relations with russia and policy choices that are disrespectful of laws and the constitution to accredit himself as a plebiscitary leader and influencer of the nation with claims of being a powerful man capable of acting with impunity unchallenged and beyond the classic checks and balances mechanisms trump has exposed the fragility of american democracy due to the inadequacy of its immune defenses and set off alarm bells about the need for adequate reinforcements the problem is all the more serious because the weakening of american democracy could result in the short circuiting of other democracies in the rest of the world in order to prevent this from happening as far as legal techniques can the authors suggest some steps that can be taken

from one of america's preeminent national security journalists an explosive news breaking account of donald trump's collision with the american national security establishment and with the world it is a simple fact that no president in american history brought less foreign policy experience to the white house than donald j trump the real estate developer from queens promised to bring his brash zero sum swagger to bear to cut through america's most complex national security issues and he did if the cost of his america first agenda was bulldozing the edifice of foreign alliances that had been carefully tended by every president from truman to obama then so be it it was clear from the first that trump's inclinations were radically more blunt force than his predecessors when briefed by the pentagon on iran and the strait of hormuz he exclaimed the next time iran sends its boats into the strait blow them out of the water let's get mad dog on this when told that the capital of south korea seoul was so close to the north korean border that millions of people would likely die in the first hours of any all out war trump had a bold response they have to move the officials in the oval office weren't sure if he was joking he raised his voice they have to move very quickly it became clear to a number of people at the highest levels of government that their gravest mission was to protect america from donald trump trump and his generals is peter bergen's riveting account of what happened when the unstoppable force of president trump met the immovable object of america's national security establishment the cia the state department and above all the pentagon if there is a real deep state in dc it is not the fbi so much as the national security community with its deep rooted culture and hierarchy the men trump selected for his key national security positions jim mattis john kelly and h r mcmaster were products of that culture trump wanted generals and he got them three years later they would be gone and the guardrails were off from iraq and afghanistan to syria and iran from russia and china to north korea and islamist terrorism trump and his generals is a brilliant reckoning with an american ship of state navigating a roiling sea of threats without a well functioning rudder lucid and gripping it brings urgently needed clarity to issues that affect the fate of us all but clarity unfortunately is not the same thing as reassurance

in george c edward iii s changing their minds donald trump and presidential leadership edwards looks at the microcosm of donald trump s first term as president and uses it to evaluate current theories of the power of presidential persuasion edwards contends that the idea of the bully pulpit the argument that presidents have the ability to persuade the public and members of congress to support their policies because of their office and the media attention they receive is nonsense and that the way presidents accomplish their goals is by identifying strategic opportunities alliances with rising interest groups or the cultivation of members of congress to make progress on issues for which there is already support for the president s position edwards is critical of presidents who think they can successfully restructure the politics of the country his argument is that trump had relatively limited opportunities to change the dialogue around issues such as health care and has done a bad job of taking advantage of the opportunities that he has been offered except on taxes he also looks at the way trump has dealt with congress and placing it in the context of scholarly work on presidential congressional relations shows why trump has been a failure in dealing with the legislature

the media and his political foes frequently attack donald trump with claims that he is mentally unfit for the presidency increasingly his critics label him unstable crazy or insane but these armchair diagnoses have more to do with a dislike of his policies than any real clinical analysis in psychologically sound sheldon roth m d draws on decades of psychiatric and academic experience to reveal president trump in a holistic manner an understandable stable even likeable person what emerges is a complex portrait of a man who has been effective and successful in business and politics but who also has regrets about failings in his personal life drawing on little known aspects of trump s background such as his love for the film citizen kane as well as or his decades long friendship with positive thinking advocate the reverend norman vincent peale dr roth paints a portrait of a
